POPULATION EDUCATION

About the *Counting on People Curriculum*

Discover an elementary curriculum that connects students to the world around them while building their math, literacy, technology, and critical thinking skills. Explore the fundamentals of human geography and ecology including how populations grow and use resources, the importance of wildlife and healthy ecosystems, and how we can all work toward a sustainable planet where everyone's needs are met.

About PopEd

Population Education (**PopulationEducation.org**) is a non-profit program that provides resources and professional development for K-12 educators focusing on human population trends and their impacts on natural resources, environmental quality and human well-being. PopEd is a program of Population Connection.
